1 Profile

Full Stack Developer with experience in React, .NET, Node.js, and SQL, creating responsive and efficient web applications. Led frontend and backend development in open source projects such as YumYumYes! and DevEx Tools with Chingu, using Scrum methodology. Contributed to the development of UTESUR's institutional website, along with technical support in hardware and network setup and maintenance. Third-year Computer Science student at UTESUR, seeking to bring innovative solutions to agile teams.

2 Technical Skills

- **Frontend:** React, JavaScript, CSS, Tailwind
- **Backend:** .NET (C#, ASP.NET), SQL, Node.js
- **Tools:** Git/GitHub, Jira
- **Methodologies:** Scrum, Agile development
- **Technical Support:** Hardware installation, maintenance, network configuration, software installation

3 Personal Projects

YumYumYes! (Chingu Voyage 45)

2023

Responsive web platform to explore recipes, built with React, Tailwind CSS, and Node.js. Developed the HomePage, creating sections and components, along with button animations, in an agile Scrum environment.

Demo: yumyumyes.com

GitHub: <https://github.com/chingu-voyages/yumyumyes>

DevEx Tools (Chingu Voyage 46)

2024

Tool suite for frontend developers, built with React and CSS. Led the development of the CSS Shadow Generator and HTML Table Generator in Scrum sprints.

Demo: devex.tools/shadows

GitHub: <https://github.com/chingu-voyages/devex.tools>

4 Work Experience

Full Stack Developer (Open Source Contributor)

Chingu, Jan 2024 – Mar 2024

- Developed the HomePage, creating sections and components, along with button animations for YumYumYes!, a responsive web platform, using React, Tailwind CSS, and Node.js, in an agile Scrum environment.
- Led the development of the CSS Shadow Generator and HTML Table Generator for DevEx Tools, using React and CSS, enhancing usability for frontend developers in Scrum sprints.
- Collaborated in an agile team, participating in daily Scrum meetings, using Git/GitHub for version control and Jira for task management.

Web Developer and Technical Support

UTESUR, Feb 2022 – May 2023

- Contributed to the development of an institutional website, implementing responsive interfaces with React and Tailwind CSS for a modern and accessible user experience.
- Developed backend features using .NET and SQL, including data management and APIs to integrate dynamic content, improving site efficiency.
- Carried out hardware installation and maintenance, network configuration, and software installation, achieving 95% user satisfaction in surveys.
